INTRODUCTION

In the spring of 2003, the New Brunswick Department of Training and Employment Development, Human Resources Development Canada - New Brunswick Region, the Prince Edward Island Employment Development Agency, and Human Resources Development Canada - Prince Edward Island Region commissioned the Small Business and Special Surveys Division of Statistics Canada to design and conduct an hourly wage rate survey for approximately 200 occupations in New Brunswick and Prince Edward Island. The survey was carried out by Statistics Canada in the summer of 2003 and resulted in the collection of wage data for 164 occupations in New Brunswick.

For New Brunswick, the main objective of the survey was to produce up-to-date statistical information on hourly wage rates for a subset of occupations in New Brunswick classified according to the 2001 National Occupational Classification (NOC) structure. Data was collected on starting wages with no experience, starting wages with experience, wages after one year, maximum wages, and the most frequently paid wage for both full-time and part-time workers in each occupation, at the provincial level and by the boundaries of the two former Employment Insurance regions in New Brunswick. The former Fredericton/Moncton/Saint John and Restigouche/Charlotte regions provide an urban/rural disaggregation.

To provide a complete picture of wages for each occupation, data was cross-tabulated by industry (using the Standard Industrial Classification, 1980, and North American Industry Classification System Canada, 1997) and by unionized/non-unionized workers. Using a Computer Assisted Telephone Interview system, data was collected from establishments in New Brunswick having six or more employees. The survey sponsors intend to use the information for analytical and program purposes, including the creation of occupational profiles.

This report contains hourly wage rate information for 164 occupations in New Brunswick, using the data collected for the 2003 New Brunswick Wage Survey. For further information, including unionized/non-unionized, part-time/full-time, urban/rural, industrial hourly wage rate disaggregations, please consult the 2003 New Brunswick Wage Survey online database located at the following websites:

Each job title is accompanied by its corresponding National Occupational Classification (NOC) code and a description of the nature of work particular to that occupation. Some example titles are provided to illustrate the range and types of jobs this occupation covers.

For each job title, the total number of persons employed in New Brunswick is disaggregated by gender and average level of employment income (salary). This information comes from 2001 Census crosstabulations.

Additional wage data is presented in table form outlining the average, the minimum, and the maximum hourly wage paid to New Brunswick workers in each occupation according to their employment experience. Wages are defined by the following categories: starting with no experience, starting with experience, after one year, the maximum paid, and the most frequently paid. Data is provided for the most frequently paid wage (the mean, the minimum, the maximum) for each New Brunswick occupation surveyed in 2003.

The number of survey observations (employers contacted) and its coinciding coefficient of variation (CV) are also provided for each occupation. The CV indicates the degree to which the wage data is statistically reliable or the degree to which this data accurately represents actual wages. A CV represented by the letter "A" indicates a very good statistical reliability, a CV of "B" represents a good reliability and a CV of "C" represents a good to poor reliability rating and should be used with caution.

The New Brunswick Department of Training and Employment Development and Human Resources Development Canada - New Brunswick Region would like to express sincerest thanks to all those who helped to make this product possible. In particular, Pierre Renault and Kelly Rodgers-Sturgeon of the New Brunswick Department of Training and Employment Development, Mary Hunter of the Prince Edward Island Employment Development Agency, and Diane Robertson of Human Resources Development Canada - Prince Edward Island Region.
